

## FOR IMMEDIATE RELEASE

### HUNGARY IPv6 Forum Formed

---

**Budapest/Luxembourg, February, 2012** - The IPv6 Forum is pleased to announce the establishment of the Hungary IPv6 Forum under the leadership of Dr. Sandor IMRE, President of the Hungarian IPv6 Forum as its chair. Prof. Imre is the Head of the Department of Telecommunications at the Budapest University of Technology and Economics.

The prime objective of the Hungary IPv6 Forum and its members is to promote deployment and swifter uptake of the new Internet using the new Internet Protocol version 6 (IPv6) with support from industry, education, research communities and government agencies enabling equitable access to technology and knowledge.

**"The Hungary IPv6 Forum has been established to revive in the Hungary Internet community a new momentum and a sense of responsibility in this marathon undertaking in the deployment of IPv6"** said Latif Ladid, IPv6 Forum President.

**"The Hungarian IPv6 Forum will engage previous and new key stakeholders from government, industry and academia to forcefully promote the deployment of IPv6 in Hungary"** Stated Dr. Sandor IMRE, President of the Hungarian IPv6 Forum.

The Internet World has been using the Internet Protocol version 4 (IPv4) for the last two decades. Despite its tremendous success, IPv4 is showing signs of strain especially in its fast depleting IP address space and its growing security concerns. IPv6 preserves everything good in today's Internet, and adds much more, such as virtually unlimited IP address space to connect everyone and everything, stateless auto-configuration, seamless mobility, automated network management, mandated security and new optional service levels.

#### About the Hungary IPv6 Forum

The Hungary IPv6 Forum is a chapter of the IPv6 Forum dedicated to the advancement and propagation of IPv6 in Switzerland. Comprised of individual members, as opposed to corporate

sponsors, its mission is to provide technical leadership and innovative thought for the successful integration of IPv6 into all facets of networking and telecommunications infrastructure, present and future. <http://ipv6forum.hu/>

## About IPv6 Forum

The IPv6 Forum is a world-wide consortium of international Internet service providers (ISPs) and National Research & Education Networks (NRENs), with a mission to promote IPv6 by improving market and user awareness, creating a quality and secure New Generation Internet and allowing world-wide equitable access to knowledge and technology. The key focus of the IPv6 Forum today is to provide technical guidance for the deployment of IPv6. IPv6 Summits are organized by the IPv6 Forum and staged in various locations around the world to provide industry and market with the best available information on this rapidly advancing technology.
